\$ROTTO is a community-driven token on Binance Smart Chain (BSC) ⚡ with deflationary properties that pays out reflections rewards to holders (automatic yield generation).

\$ROTTO employs four simple functions: Reflections, BuyBack, Burns and Marketing automatically.

The tax fees will be as follow 5% fee for every buy and 7 % fee for every sell transaction.

The buying fees will be divided into three parts: 2% will be bought back and then burned automatically, another 2% for Marketing and development of the coin and the remaining 1% is added to liquidity.

While for sale we have 4 functions:

For each sell 2% will be given in rewards to holders in stablecoin (Busd)
(Based on how much a holder owns)

2% is bought back and then burned automatically,

ROTTOKEN SOCIAL

Mental health

At Rottoken we are very sensitive to one of the main current issues that concern our society. No matter what country of origin, nationality or race you are, surely you have heard about the subject and know someone that has needed help. Fortunately, in recent years the term mental health has been normalized, it is much more present in our conversations and is treated much more naturally. Could this be that mental health is not only related to the emotional development of the individual. In our day to day, we suffer situations that can alter our well-being.

It is for all this that at Rottoken we are committed to helping organizations that provide mental health service and we will be making regular donations so they can continue to provide services to those who need it more.
